

ADD/ADHD

Community Workshop

Your Child has been diagnosed with **ADD/ADHD**, you have tried **EVERYTHING** and nothing seems to work. You aren't happy with putting your child on medications but you don't know another way. Teachers are frustrated at school, you are frustrated at home and you can't figure out what to do next for the child you love so much.

What can you do when you've tried EVERYTHING?

First of all, I want you to know you are not alone. We have helped hundreds of children diagnosed with ADD/ADHD just like your child to move past this challenge and flourish in school and at home.

We understand the stress this can cause your entire family and our #1 Priority is to help children to flourish with ADD/ADHD, without drugs or medication. Imagine, a child that can interact in social situations and can actually prevail in school!

We've been taught that ADD/ADHD is a disorder, but we would like to offer you this- **your child is FINE**, this is ***NOT a disorder or DISEASE***. ADD/ADHD can best be explained this way.... your child has a Ferrari brain with bicycle brakes. The solution therefore is to strengthen the brakes. ADD/ADHD is treatable and we have been caring for adults and kids with ADD/ADHD for YEARS with **great success**. When cared for appropriately there is NO REASON your child should not ***soar like an eagle!***

This 60 minute workshop could change your life.

It's your call, but I think we should at least talk...

Get your answers at the upcoming **FREE** community workshop presented by Dr. Leah Dukowitz.

Register TODAY seating is limited

Date: March 20, 2014

Time: 6:30 – 7:30 pm

Location: **Sylvan Learning Center**

1911 Frank Scott Pkwy East #3
Shiloh, IL 62269
